## Alpine Lakes Ranch Water Company

**List of Cistern Testing Company's** The following is a list of company's in the area that do bacteriological testing for cisterns. WATCO does not have a vested interest in any company. WATCO does strongly encourage that each property owner with a cistern test at least annually.

If you decide to use SJBPH. I have a limited supply of the test bottles and can instruct you on the testing procedures. There is a product available for individual use of testing cisterns by the name "**Industrial Test Systems 487197 WaterWorks EZ Coliform Cult Bacteria Test**", and can be purchased on Amazon or through their website [www.sensafe.com](http://www.sensafe.com). Other test kits are available, if you search for "Coliform Cult Bacteria Test".

San Juan Basin Public Health                      970-335-2039

Green Analytical                                      970-247-4220

Inspection and testing of individual cisterns are the responsibility of the home owner, If you detect the presence of Coliform or E. Coli in your cistern, the water's operators will assist you for corrective actions if needed.
